- Spanish (First Language)
- English (Fluent)

Work Experience

Full Stack Developer / Codefuel

Jul 2015 - Current

- Learned PHP, Wordpress, Angularjs, Node, React and Redux.
- Developed multiple Wordpress' Plugins.
- Developed a Magento extension to make use of MercadoLibre's API and manage all MercadoLibre's activity (articles, orders and questions) within Magento.
- Got involved in a project called Somosport, where I developed a React app and assisted in a couple of Angularjs apps, the development of a Node API and the design of the DB (Postgres).
- Enhanced the team's workflow by implementing Browsersync into our projects.
- Solved an issue with our API hitting R14 in Heroku due to Node's Lazy GC.
- Met regularly with our users to stablish their requirements and keep track of the implementantion of the project.

Education

College: Universidad Metropolitana

2010 - 2016

- Obtained a Systems Engineering Degree in the Universidad Metropolitana where I was able to pick up the concepts of Algorithms, OOP, DB, DBA, MIS and Software Engineering among others.
- Was part of the Systems Engineering's Students' Union two consecutive years. The first year as a collaborator and the second year as Chief Coordinator.

High School: Colegio La Salle La Colina

2005 - 2010

- Obtained my High School Diploma in La Salle La Colina.
- Was part of the school soccer team. This activity allowed me to understand the value of the team work and discipline.
