Irving Ventura
Frontend Engineer

Experience

Shift Technologies

Engineering Team Lead 📅 Apr 2021 - present

▸ Oversaw the growth of the team from 5 to 10 engineers.

▸ Align cross-teams' efforts to ensure successul delivery of features.

Senior Frontend Engineer 📅 Apr 2020 - Apr 2021

▸ Maintained and improved the Design System of the Claims Automation product.

▸ Introduced agile best practices to the team, and led the scrum rituals.

▸ Created a safe space for tech discussions and the development of POCs that led to the adoption of typescript and a 90% cut in the time of our visual regression tests.

Fineway

Software Engineer 📅 Sep 2019 - Mar 2020

▸ Led Frontend Development of the Instant Trip Planning platform.

▸ Onboarded and mentored the last two engineers joining the team.

▸ Established coding conventions in order to improve the consistency of the development coming from offshore teams.

▸ Reduced substantially the TTFMP and TTI by introducing code splitting.

Networkly

Chief Technology Officer 📅 Nov 2017 - Dec 2019

▸ Led a remote team in the development and launch of a professional networking platform.

▸ Worked closely with the CEO, translating his ideas into technical requirements and helping him in the design of our business plan.

▸ Designed the architecture of the platform making use of technologies such as NestJS, Socket.IO, MongoDB, Elasticsearch, Heroku, AWS Amplify, React and Redux.

InterNations

Frontend Engineer 📅 May 2018 - Sep 2019

▸ Development of new features using React and Redux as well as maintenance of the legacy backbone codebase.

▸ Implemented the redesign of the registration process in React while accommodating to heavy constrains in the backend that prevented the use of REST apis.

▸ Improved the UX/UI of the internal manual approval process, reducing the amount of effort required to handle user registrations.

Full Stack Developer

Codefuel 📅 Jul 2015 - Sep 2017

▸ Development of multiple applications in React, AngularJS and Node.js

▸ Met regularly with our customers to gather feedback and ensure that the roadmap of the platform was aligned with their needs.

▸ Enhanced the team's workflow by integrating modern web development tooling such as browserify, babel and webpack.
